### DELIVERY SERVICE

We run our own in-house delivery service on all the products we supply. We will always aim to have the goods delivered ready for when you need them. Ask in the centres for a price to deliver your goods or alternatively, just drive in to any of the centres and we'll be pleased to help you with your collection.

### INSTALLATION SERVICE

While many of our customers love to DIY, if you don't have the time or the necessary skills, we have a team of fitters able to undertake most projects. For fencing, decking, gate fixing, cabins or whole garden makeovers, we'll be able to turn your dream into reality. We can even build up the flat pack furniture for a small extra charge.

Some timber products will develop checks which are splits across the grain; this is perfectly natural as the timber dries and will not reduce the strength of the timber. As timber is a natural product it has the potential to move with the atmospheric conditions and we cannot be held responsible for this movement. In the very rare occasion where there is a proven manufacturing defect, Earnshaws' liability shall in no circumstances exceed the price of the timber affected. Earnshaws shall not in any way be held responsible for any additional consequential costs or losses.

Prices correct at the time of going to press, but are subject to change without prior notice. All goods remain the property of the vendor until full payment has been received.

All Prices INCLUDE VAT

# Welcome to Earnshaws Fencing Centres

Packed full of natural timber products to inspire you with ideas for your home and garden!

We are proud of our exceptional and inspiring range – from garden furniture, decking and pergolas to essentials like fencing, panels, sheds, cabins and gates. Finishing touches are our speciality and ranges include bark, aggregates, paving, planters and benches – in fact, everything except the plants themselves.

Friendly expert advice is always on hand and the vast stocks and extensive ranges mean that you'll be able to take away what you need and get cracking on that new project straight

away. The well stocked shops are thoughtfully laid out with the things needed to finish any job – nails, screws, hinges, brackets and tools.

We are proud of our traditional values of honest advice, high quality and value for money combined with a keen eye for interesting products and emerging trends in garden design. The result is innovative displays and product ranges that change and evolve each season.

Proud to be an independent Yorkshire company with a long history and tradition, many of the products we sell are manufactured in the UK using timber grown in our own woodlands.

We have unique and exclusive ranges, displayed in accessible and tranquil settings, perfect for browsing, guaranteed to inspire! If you have already planned your next piece of garden design – then look no further than Earnshaws Fencing Centres, we have huge ranges in stock ready to collect from site.

## Earnshaws Sustainability Programme

At Earnshaws we have always had a strong interest in ecological and environmental matters. From sourcing our material to managing our woodland, we have always worked to the very best practice. We always try to minimise fuel miles on all our outward deliveries and purchases, and try to source locally wherever possible.

## Interbranch Transfers

You will normally find we have what you are looking for in stock at all three centres. However, from time to time less popular lines may only be in stock and in bulk at our Midgley Centre. We will happily transfer the stock you need for collection at your nearest centre – so please feel free to ask the staff on site. If you are looking for a very specific line or a large quantity please phone ahead to check that it's in stock.

# FENCING

## Premium Fence Panels

This range of panels are built on the continent, using a rebated frame to ensure a strong and durable panel and are supplied pressure treated for maximum protection.

They are suitable for use with either standard or reeded timber posts or will fit within the 'H' section concrete posts. If using these panels with concrete gravel boards, a pair of timber fillets are required.

3.6m x 100 x 100 Top rail	£18.99	<b>£17.99</b>

# Recommended Fence Post Sizes

We strongly recommend a minimum of 610mm (2ft) of post into the ground. Don't forget you will need to allow for longer posts when fencing on sloping ground.

Ensure that the strength of the post matches the style of panel, for heavier panels such as the Double Sided Paled Panels, a minimum of 75mm x 100mm is recommended for the lower sizes, with 100mm x 100mm for the taller panels. For the lighter trellis panels 75mm x 75mm section posts should be sufficient.

As a general rule, base your post decision around the weight, height and how exposed the panel will be to the wind. **Our sales team will be happy to answer any specific enquiries.**

**A FULL RANGE  
OF POSTS  
ARE AVAILABLE**

See page 24 for more information.

## Driveway Gates

All our driveway gates are made to measure by our in-house joiners. The fitting and measuring of driveway gates is not easy and should only be undertaken by competent DIY'ers or tradesmen. At our fencing centres we have a team of skilled gate fitters who will measure, supply and fix your entrance gate.

All driveway gates are priced to requirements and due to the variations in the price of joinery grade timber, we are unable to list individual prices in the price list. Please ask in the centres for prices for your specific sizes and we can print out a sheet with each style individually priced.

# Tankersley

These gates are all supplied in an untreated finish and will require a good quality treatment before fitting. These quality gates are made to a slightly lighter construction than the Stocksmoor gates. Again these gates are made to order only so the gate is tailor-made to fit your gap.

Ask in the centres for details on the wide range of stains and preservatives we can offer to ensure these gates offer years of service.

All are supplied untreated.

## Postsaver and Treatments

Our standard timber sourcing policy is mixed species of homegrown softwoods and while we air dry these pre-pressure treatment, unfortunately, due to an industry wide change in the types of treatment available, we cannot offer any lifespan guarantees.

If a defined lifespan is required we currently offer two alternatives; the planed or reeded posts are produced from kiln dried Redwood and come with a 10 year guarantee. Alternatively the Postsaver barrier system prevents the premature failure of timber posts by providing a physical barrier to fungal entry at ground level.

Suitable for use with most posts this product also comes with a 10 year guarantee. For products not in ground contact standard treatments are more than satisfactory. For further details ask in store or look at the treatment section on our website.

# Concrete Posts

Drycast concrete posts have a rough cast surface that is uniform on both faces and are slotted on two opposite sides in a H pattern to allow panels to be easily inserted. We also stock an end post which has a single slot, and a corner post which has two slots on adjoining sides.

The gravel boards are supplied in an imperial 6' length to fit under the Waney Lap and Featheredge panels. When using the gravel boards under the metric sized premium panels don't forget to use packing fillets available from stock.

# Stakes and Machine Rounds

We stock two ranges of round timber for agricultural, equestrian and landscaping projects. The stakes are a rustic uneven finish with a sawn point while the machine rounds have a uniform diameter with a turned point where applicable and a chamfered top. We can supply a wide choice of special sizes in either range. Please ask for specific requirements.

**All supplied with pressure treated finish.**

# MET POSTS

Manufactured from heavy gauge steel with a protective coating, Metpost post supports are designed to allow the erection of fence posts in minutes without the need for digging holes or mixing concrete. The spikes are ideal for use in less exposed areas for temporary fencing while the bolt-downs make fixing to paths or driveways easy. Available in two styles: the traditional wedge-grip which grips the post as it is knocked into the support, and the bolt-grip which grips the post by tightening two bolts.

450mm x 50 x 50 Wedge-grip spike	£5.69	<b>£5.49</b>

# A GREAT TRADITION IN FENCING

The  
Earnshaw  
Family Tree ~

# EARNSHAW'S

FENCING CENTRES

Records show that the Earnshaw family has been connected with the timber trade since 1780.

The business today, which was founded in 1860, carries the name of Job Earnshaw, who worked falls of timber in the local area near Wakefield. Soon his brothers joined him in the venture, and a small sawmill was built on the Midgley site, producing parts for horse drawn carts, gates, fence posts, rails and various items used in agriculture.

The company is still owned and managed by descendants of the founders and we still maintain the same service tradition that was so important back in the 1860s. While the company has adapted and changed over the years we have built on those years of experience to be true experts in our field.

*Many of the products we sell today are still made by hand in our workshops where quality and durability are second nature.*
