We're with you every step of the way....

We understand that purchasing a log cabin is likely to be a once in a lifetime occurrence. We don't expect you to be an expert (although we don't mind if you are) – that's why we've made the process of choosing your log cabin as straightforward as possible.

Quality as standard

All of our cabins are built to the same high specification using joinery grade white wood, 45mm log walls, 28mm flooring and 21mm roof boards. No skimping on timber here.

Superior fittings

Insurance grade locks, high quality polyester-based felt and quality glazing. We don't build our cabins to be the cheapest on the web - we build in quality as standard.

Designed around you

Our Cabin Collection is composed of five clearly defined models, designed to meet your needs whilst adding a touch of flair and originality to your garden.

For more information and a gallery of images please visit www.jobearnshaw.co.uk

Simple, honest pricing

Our cabin prices include floors, roofs, delivery and fitting - many companies offer these as 'optional extras'! We don't supply build-it-yourself kits because we want to make sure your cabin goes up, and stays up, without a hitch.

On-site displays

There's really no substitute for touching, feeling and stepping inside our cabins. That's why we've assembled a comprehensive selection of display models across our three centres.

Dedicated experts

At Midgley, Wentworth and Brigg, we have well trained staff to inform and advise you at every stage.

Made in Yorkshire

Working closely with our partner company LGL, based in a dedicated workshop at our Wentworth centre, we hand build every cabin specifically to suit your requirements.

ARCADIA

The only limitation
is your imagination

Whether you're dreaming of a place to entertain guests, or you are a modern professional requiring a work-from-home studio, the Arcadia can become a true living space in your garden.

All of our Arcadia cabins are fully bespoke, designed to your exact specifications and as a result are quoted individually. We will even provide a scaled CAD drawing showing what your design would look like.

For more information and a gallery of images please visit www.jobearnshaw.co.uk

The Arcadia utilises the same 45mm log as our traditional cabins, but with a different 'post & panel' construction method. The Arcadia can be supplied complete with electrics, lights and an insulation package to enable year-round enjoyment.

We can also build using pine, stainless steel, cedar or composite boarding, under pitched or flat roofs, with options including floating walls and double glazing. Bring us your idea and we will bring it to life – and that even includes semi-subterranean cabins!

Totally bespoke build from
planning to construction

Potential to be fully insulated for
year round use

make a **contemporary** statement

creating a **classic chalet** look

Middleton

Traditional log cabin
built especially for you

The Middleton Cabin is a traditionally styled log cabin with classic 'chalet style' front, and is versatile enough to use for relaxation, work, study or play.

You can choose to preserve the natural charm of a wood grain finish or go for your own unique painted combination. Either way, a Middleton Cabin will look fantastic in your garden and provide a robust and practical way to make the most of your outdoor space.

Our experts will be delighted to help you configure a Middleton Cabin to suit your garden and meet your needs.

Log cabins are a versatile, affordable and increasingly popular way to use space in your garden to enhance your lifestyle. Whatever you have in mind for your log cabin, we can create the perfect building for you.

Relax, work, study or play

Traditional log cabin styling

Wide range of sizes, doors and windows

For an easy way to specify and configure your perfect cabin, pick up our **Cabin Builder Brochure** on-site or download it from our website.

Retreat

A contemporary outdoor living space

The Retreat is a new and exclusive outdoor living space, on display at Midgley.

Perfect for al-fresco dining, as a hot tub shelter, home bar, undercover play area or a relaxing area from which to enjoy your garden... the potential is as wide as your imagination!

Perfect for outdoor social gatherings

Supplied flat packed and ready to build

Optional flooring

For an easy way to specify and configure your perfect cabin, pick up our **Cabin Builder Brochure** on-site or download it from our website.

Highfield

The shed of sheds

We like to think of the Highfield as the most robust, reliable garden shed you will ever own. Pick the right size for you, position the fully boarded door and window(s) in the cabin front, select an appropriate roof style, and away you go.

Constructed from 45mm solid interlocking timber with insurance grade doors and locks, the range of premium Highfield garden buildings are substantial and secure and are sure to offer many years of flexible service.

Robust workshop, hobby room or serious storage

Two roof styles to choose from
Simple off-the-peg sizing and pricing

Highfield *plus*

The ultimate flexible workplace

We know every large project has it's own quirks and requirements, so all Highfield Plus buildings are designed to your exact specifications and quoted individually. We will even provide a scaled CAD drawing showing what your design would look like.

Large footprint workshops, garages and much more

Tough, durable and functional

Totally bespoke build

At Earnshaws, we've developed our new Cabin Collection to ensure that whatever you have in mind for your log cabin, we can create the perfect building for you.
