## PRESSURE TREATED

Most of our products are pressure treated to protect against rot, decay and insect and fungal attack.

## DELIVERY SERVICE

We run our own in-house delivery service on all the products we supply. We will always aim to have the goods delivered ready for when you need them. Ask in the centres for a price to deliver your goods or alternatively, just drive in to any of the centres and we'll be pleased to help you with your collection.

## INSTALLATION SERVICE

While many of our customers love to DIY, if you don't have the time or the necessary skills, we have a team of fitters able to undertake most projects. For fencing, decking, gate fixing, cabins or whole garden makeovers, we'll be able to turn your dream into reality. We can even build up the flat pack furniture for a small extra charge.

## TRADE

At Earnshaws we have been supplying direct to the trade for over 160 years. For any trade enquiry big or small, or for further information regarding our comprehensive range of trade services, please contact Michael Mountain, Head of Trade Sales.

## Premium Fence Panels

This range of panels are built on the continent, using a rebated frame to ensure a strong and durable panel and are supplied pressure treated for maximum protection.

They are suitable for use with either standard or reeded timber posts or will fit within the 'H' section concrete posts. If using these panels with concrete gravel boards, a pair of timber fillets are required.

All heights given are to the tallest point. For shoulder measurements please reduce the given height by 200mm.

# Approved Contractor Fitting Service

While many of our customers love to DIY, if you don't have the time or the necessary skills, we have the perfect solution.

We've put together a carefully selected group of specialist contractors able to undertake almost any project. We know our approved contractors deliver fantastic workmanship, using high quality materials supplied by us. From all types of fencing work, to decking and gate installation, through to complete garden makeovers, we'll be able to turn your dream into reality.

Speak to a member of staff at your nearest centre about the project you have in mind, and we'll arrange for the ideal contractor to contact you and provide a quotation.

## Delivery Service

We run our own in-house delivery service to ensure our bigger, bulkier products can make it to your garden.

Contact your nearest centre for prices and delivery availability.

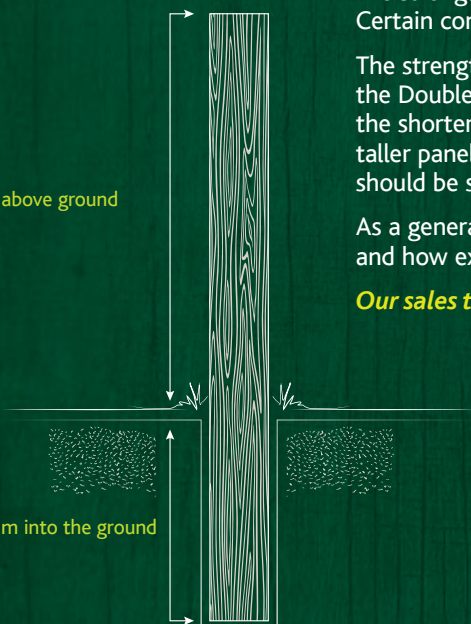

## Recommended Fence Post Sizes

Typical 1800mm post

1200mm above ground

Set 600mm into the ground

We strongly recommend a minimum of 600mm (2ft) of fence post into the ground. Certain conditions, such as slopes and soft ground, will require longer fence posts.

The strength of the post is dictated by the section size. For heavier panels, such as the Double Sided Paled Panels, a minimum of 75mm x 100mm is recommended for the shorter sizes, while 100mm x 100mm posts would be more appropriate for the taller panels. For lighter panels such as trellis and lattice, 75mm x 75mm section posts should be sufficient.

As a general rule, base your post decision around the weight and height of the panel, and how exposed the fence will be to the wind.

*Our sales team will be happy to answer any specific enquiries.*

# Timber

At Earnshaws we aim to supply from stock a wide range of pressure treated softwood for all fencing and landscaping applications. With such a wide range on offer it can be difficult to decide exactly which product best meets your requirements – please give your nearest centre a call for friendly advice and information.

Our range of posts are supplied pressure treated and sawn from mixed softwood species. They are used as the basic building product for most fences. Available in a mix of lengths and sections to suit most jobs in a standard sawn finish. Other non standard sizes available to order, ask at your local fencing centre for details.

# Composite Decking

Composite decking is a durable, low maintenance, and increasingly popular alternative to traditional timber decking.

We've decked out our displays with a range of composite boards in different colours and profiles, so you can see the benefits for yourself. While it may not be cheap, composite decking can add a contemporary feature to the right setting.

# Gates

## Garden Gates ~ Field Gates ~ Driveway Gates

We pride ourselves on offering the most extensive range of high quality timber gates in the area. From garden gates to bespoke driveway gates, estate gates to field gates – we have something for all applications.

Each of our three centres feature well stocked shops with a huge range of gate ironwork, supported by well trained staff with years of specialist knowledge and experience.

Supplied  
pressure  
treated

We operate a traditional joiners shop at our Midgley centre, where expert craftsmen hand-build the vast majority of our extensive range.

Whether you require a gate to provide security, privacy, or simply to complement your home, we're confident that we can provide the right solution for you.

## Ironwork, Hinges, Catches and Security

We have a huge range of gate hanging sets and padlocks.

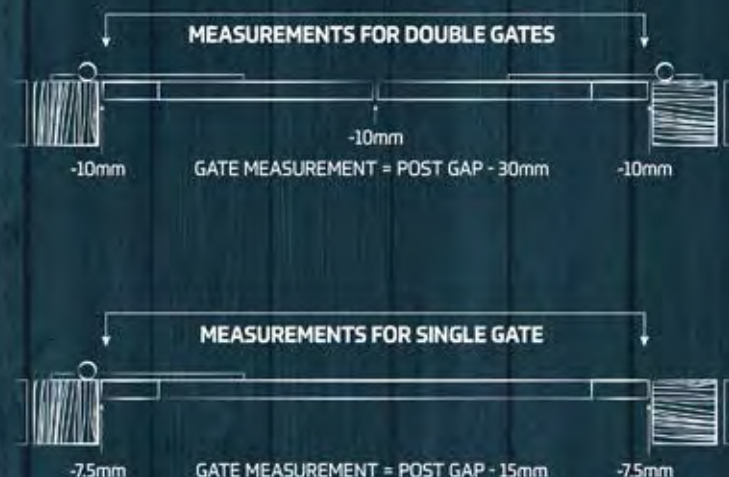

*Please ask in store for any specific requirements or a recommendation on which ironwork will suit your specific gates.*

# How To Measure For Bespoke Gates

To ensure accurate results, we always recommend installing gate posts before the measurements for bespoke gates are taken.

Once the gate posts are in place, take three measurements from between the posts – top, middle, and bottom – and reduce the SMALLEST measurement by 30mm for driveway gates, or 15mm for single gates. This measurement is now the width of gate required, providing a neat fit while allowing for the natural swelling that is a feature of timber gates. Don't forget to allow for 40-50mm of clearance beneath the gate too.

Measuring for and fitting gates is not easy and should only be undertaken by competent DIY'ers or tradesmen. The above is only a guide and does not consider a huge range of variables that can impact upon gate size and hanging technique.

If in doubt, why not consider our **Approved Contractor Fitting Service** to complete the job.

# Driveway Gates

## FULLY BESPOKE AND MADE TO ORDER!

At Earnshaws, we've carefully designed our range of driveway gates to suit every taste and requirement. Whether you're looking for privacy, security, or simply want to create a grand entrance, we're confident that we can craft the perfect pair of driveway gates for your home.

- **Manufactured by us.** All our driveway gates are manufactured at our Midgley centre by expert joiners using time-honoured traditional techniques.
- **Fully bespoke.** We know that every driveway is different, so we don't stock 'standard size' gates. Our driveway gates are manufactured to your exact requirements, so there's no need to compromise on fit.
- **Top quality comes as standard.** We're proud of our driveway gates – that's why every pair is constructed from premium, hand picked materials and given the care and attention they deserve.
- **On-site displays.** Read every specification on the internet that you can – but there's really no substitute for touching and feeling our driveway gates. We've assembled a comprehensive selection of display models at each of our three centres so you can judge our gates for yourself.
- **Dedicated, on-site gate experts.** Whether your local Earnshaws branch is at Midgley, Wentworth, or Brigg, we have well trained staff at each of our three sites to inform and advise at every turn.

All prices are inclusive of VAT.

All Loyalty card holders get £10 allowance towards ironwork with every gate order.

## Tankersley

Handcrafted in our workshops using premium grade joinery redwood, the Tankersley range combines high quality materials and traditional workmanship with fantastic value. # Metal Fixing Spikes

Manufactured from heavy gauge steel with a protective coating, metal post supports are designed to allow the erection of fence posts in minutes without the need for digging holes or mixing concrete. The spikes are ideal for use in less exposed areas for temporary fencing while the bolt-downs make fixing to paths or driveways easy. Available in two styles: the traditional wedge-grip which grips the post as it is knocked into the support, and the bolt-grip which grips the post by tightening two bolts.

# Firewood

**At Earnshaws we know our timber and have been cutting firewood since 1860 so you can buy with confidence.**

Our range of firewood logs are either air-dried or kiln-dried before sale, with moisture contents as low as 16 percent, and an even more impressive 6 percent for our briquettes.

Nothing beats the glow and cosy warmth of a real fire, the aroma of a barbecue or the taste of a wood fired pizza! You can burn our well-seasoned firewood logs indoors or outdoors, all year round, knowing they are as efficient and clean burning as possible.

In addition to our range of firewood, we also stock firelighters, indoor and outdoor log stores, as well as fireside accessories, buckets and fire guards.

Records show that the Earnshaw family has been connected with the timber trade since 1780.

# EARNSHAW

*GOOD WITH WOOD, GREAT IN YOUR GARDEN!*

The business today, which was founded in 1860, carries the name of Job Earnshaw, who worked falls of timber in the local area near Wakefield. Soon his brothers joined him in the venture, and a small sawmill was built on the Midgley site, producing parts for horse drawn carts, gates, fence posts, rails and various items used in agriculture.

The company is still owned and managed by descendants of the founders and we still maintain the same service tradition that was so important back in the 1860s. While the company has adapted and changed over the years we have built on those years of experience to be true experts in our field.

*Many of the products we sell today are still made by hand in our workshops where quality and durability are second nature.*

## Earnshaws Sustainability Programme

At Earnshaws we have always had a strong interest in ecological and environmental matters. From sourcing our material to managing our woodland, we have always worked to the very best practice. We always try to minimise fuel miles on all our outward deliveries and purchases, and try to source locally wherever possible.

## Interbranch Transfers

You will normally find we have what you are looking for in stock at all three centres. However, from time to time less popular lines may only be in stock and in bulk at our Midgley Centre. We will happily transfer the stock you need for collection at your nearest centre – so please feel free to ask the staff on site. If you are looking for a very specific line or a large quantity please phone ahead to check that it's in stock.

Some timber products will develop checks which are splits across the grain; this is perfectly natural as the timber dries and will not reduce the strength of the timber. As timber is a natural product it has the potential to move with the atmospheric conditions and we cannot be held responsible for this movement. In the very rare occasion where there is a proven manufacturing defect, Earnshaws' liability shall in no circumstances exceed the price of the timber affected. Earnshaws shall not in any way be held responsible for any additional consequential costs or losses.

Prices correct at the time of going to press, but are subject to change without prior notice. All goods remain the property of the vendor until full payment has been received.
